

ABHYUDAY BHADAURIYA

Forward-Deployed Solutions Architect | Applied AI | Enterprise Integrations

Bengaluru, India | abhyudaysb@outlook.com | [linkedin.com/in/abhyuday-bhadauriya-softwareengineer](https://www.linkedin.com/in/abhyuday-bhadauriya-softwareengineer) | [abhay2doit.github.io/abhyuday-portfolio/](https://github.com/abhay2doit/abhyuday-portfolio)

PROFESSIONAL SUMMARY

Forward-deployed Solutions Architect with 11+ years of experience designing enterprise integrations, customer-facing technical solutions, and AI-powered workflows. Currently working in Applied AI at Enterpret, partnering with enterprise customers to translate complex business and data challenges into production-ready solutions. Strong background in solution architecture, technical discovery, data ingestion, APIs, SFTP, Snowflake, Salesforce, agentic workflows, and cross-functional delivery. Proven ability to own strategic implementations, resolve complex technical blockers, and bridge customer needs with Product and Engineering.

CORE EXPERTISE

Applied AI & Agentic Workflows Enterprise Integrations	Forward-Deployed Engineering Snowflake / Salesforce / SFTP	Solution Architecture APIs / Webhooks / File Pipelines

PROFESSIONAL EXPERIENCE

Enterpret

Solutions Architect - Applied AI | Forward-Deployed Engineering

March 2026 - Present | Bengaluru, India

- Partner with enterprise customers to understand complex business, data, and customer-experience challenges, then design AI-powered solutions using Enterpret's customer intelligence platform.
- Own technical delivery across the customer lifecycle, from discovery and solution architecture through integration, validation, production rollout, and post-deployment optimization.
- Design and troubleshoot enterprise data integrations across Snowflake, Salesforce, SFTP, APIs, webhooks, file uploads, Slack, Qualtrics, App Store, Play Store, and other customer-support data sources.
- Translate customer use cases into scalable ingestion, enrichment, classification, and AI-analysis workflows while accounting for data quality, security, observability, reliability, and performance.
- Build agentic workflows and internal engineering tools to accelerate connection validation, integration debugging, root-cause analysis, and operational execution.
- Created and improved FDE utilities including Snowflake validation, webhook and CSV validation workflows, ingestion diagnostics, watermark checks, and a Codex-based fde-debug skill.
- Work closely with Product, Engineering, Customer Success, and Pre-Sales to resolve implementation blockers and convert recurring customer requirements into reusable platform improvements.
- Define implementation standards, technical documentation, escalation paths, and observability practices to improve delivery consistency across strategic customer deployments.

Observe.AI

Integration Lead

February 2024 - March 2026 | Bengaluru, India

- Owned integration strategy and technical delivery for strategic enterprise customers ranging from \$100K to \$15M ARR.
- Built roadmaps spanning pre-sales, technical discovery, implementation, production deployment, and customer handoff.
- Designed agentic workflows and LLM-based internal automations to reduce manual effort and improve implementation efficiency.
- Collaborated with customers and internal teams to resolve complex integration, data-delivery, and production-readiness challenges.

Senior Implementation Engineer / Implementation Engineer

March 2020 - April 2024 | Bengaluru, India

- Designed and implemented secure data integrations from CCaaS and enterprise platforms using APIs, SFTP, and file-based delivery.
- Led technical discussions with customers and cross-functional stakeholders to align requirements, architecture, and implementation plans.
- Provided customized technical solutions for complex customer use cases and ensured reliable data transfer into the platform.
- Created implementation documentation and repeatable onboarding processes that improved delivery consistency.

EARLIER EXPERIENCE

Unbxid Inc

Solution Engineer

August 2019 - March 2020 | Bengaluru, India

- Worked as a software integration engineer within the customer experience team, building onboarding and integration tools.
- Partnered with customers, third-party teams, and internal stakeholders to plan and implement technical projects.
- Collaborated with cross-functional engineering teams to evaluate solutions against evolving customer requirements.

BloomReach

Solution Engineer

September 2017 - July 2019 | Bengaluru, India

- Served as the primary technical owner for customer success, providing guidance and leadership for technical inquiries.
- Triaged production issues and analyzed configurations, application logs, and system logs to identify root causes.
- Standardized customer escalation processes and improved internal troubleshooting documentation.

Larsen & Toubro Infotech Ltd

Software Engineer

November 2014 - September 2017 | Mumbai, India

- Provided technical solutions for Citi applications and acted as a client point of contact across global teams.
- Investigated application issues, coordinated resolution across teams, and supported new releases and products.
- Created technical documentation that accelerated onboarding for new team members.

TECHNICAL SKILLS

AI & Automation: LLMs, agentic workflows, prompt design, n8n, Paragon iPaaS, Codex workflows

Data & Integrations: Snowflake, Salesforce, SFTP, REST APIs, webhooks, CSV/file ingestion, Slack, Qualtrics

Programming & Tools: Python, JavaScript, SQL, Git, integration debugging, observability, technical documentation

Architecture: Enterprise solution design, data pipelines, implementation strategy, production troubleshooting

EDUCATION

Medicaps Institute of Technology and Management

Bachelor of Engineering - Electrical, Electronics and Communications Engineering

2010 - 2014

ADDITIONAL

Languages: English (Professional), Hindi (Full Professional)

Certification: Embedded Systems and Automation

Recognition: Certificate of Appreciation
